California (Open to Relocation) · skapse@asu.edu · 602-849-3547 · linkedin.com/in/kapsesarvesh · github.com/kapsesarvesh

EDUCATION

Arizona State University, Tempe, AZ | **M.S. Computer Science** | **GPA: 3.77/4.0** *Aug 2022 – May 2024*
Coursework: Software Project Management, Data Mining, Data Processing at Scale, Information Security

University of Mumbai, Mumbai, India | **B.E. Information Technology** | **GPA: 9.08/10** *Aug 2018 – May 2022*
Coursework: AI, Big Data Analytics, Cloud Computing, Database Management Systems, Operating Systems

PROFESSIONAL SUMMARY

CS graduate with 1.5+ years of experience in AI, software engineering, and project delivery. Proven track record owning end-to-end AI data operations, automation tooling, and cross-functional stakeholder coordination across GenAI, XR, and LLM initiatives.

WORK EXPERIENCE

Amazon AGI via Keywords Studios, Remote (California) | **Project Coordinator, AI** *Feb 2025 – Present*

- Owned delivery of **5+ concurrent** annotation and data collection projects, managing **100+ annotators**, scope, QA standards, and milestones for **Amazon's Nova AI model** training pipeline
- Defined and enforced **QA/QC standards for 3 internal tools**, implementing audit reviews and structured feedback loops that **reduced annotation error rates by ~25%**
- Authored **PoC documentation and technical design proposals** for new annotation frameworks; facilitated architecture reviews with stakeholders across India and Poland teams
- Maintained project governance through **Asana boards, HEX dashboards**, and delivery reports, ensuring consistent visibility into progress and operational health across global teams

California State University, Fullerton, Fullerton, CA | **Technology Operations Specialist** *Nov 2024 – Feb 2025*

- Identified asset tracking gaps across Apple Vision Pro, motion capture systems, and 3D printers; designed and deployed a **real-time utilization monitoring solution** using Python, SQL, and Unreal Engine, improving operational visibility and resource planning

Open Future Forum, Tempe, AZ | **AI Developer** *Jul 2024 – Nov 2024*

- Engineered a **multi-platform AI content pipeline** using GPT-4 and Stable Diffusion that reduced post creation time from **3+ hours to under 10 minutes** across LinkedIn, Medium, and image assets
- Eliminated manual reformatting across **3 content channels** by automating platform-specific tone and structure adaptation, freeing the CEO and VC to focus on strategy

Arizona State University – MIX Center, Mesa, AZ | **AI Software Developer** *Sep 2023 – May 2024*

- Developed a Generative AI VR application for a **NASA astronaut** using Unity, Stable Diffusion, and Hugging Face; selected for **live demonstration at SXSW 2024** and facilitated workshops for mixed technical and non-technical audiences
- Evaluated **5+ GenAI and XR platforms** against performance, usability, and integration criteria, informing final technology selection and product feature direction

Bayer, St. Louis, MO | **Software Engineering & Technology Intern** *Jun 2023 – Aug 2023*

- Led migration of **20+ VR devices** from Oculus to **Meta Quest for Business**, coordinating testing, deployment, and stakeholder reporting to support enterprise adoption
- Built **8 Power Automate workflows** and a **Power BI dashboard**, reducing manual reporting time and improving operational visibility for the engineering team

SKILLS

Languages & Frameworks: Python, SQL, JavaScript, Java, C++; React.js, Node.js, Flask, Django

AI & ML: TensorFlow, PyTorch, Hugging Face, Stable Diffusion, Scikit-learn, OpenCV, Pandas, NumPy

Automation & Tools: Playwright, Selenium, Streamlit, HEX, Power Automate, Power BI, AWS (Lambda, S3)

PM & Collaboration: Jira, Confluence, Asana, GitHub, Google Workspace, Slack, Excel, SharePoint

Domains: AI annotation, LLM training pipelines, QA/QC workflows, prompt engineering, data pipeline design

PROJECTS

Circuit Automation Suite | *Python, Playwright, Streamlit*

- Browser automation toolkit that cut manual annotation task processing time by **~40%**, enabling scalable QA workflows across internal tool pipelines

Fake Reviews Detection System | *Python, NLP, Scikit-learn*

- Benchmarked **6 NLP classification models** on accuracy, precision, recall, and F1; top model achieved **91% accuracy** on a 40K-review dataset, outperforming baseline by 18%
- Stored and queried review metadata in **MySQL** with indexed lookups, supporting batch classification of **1,000+ reviews** per request without performance degradation
